

4CF HalnyX 2.0 – the ultimate Real-Time Delphi platform

Halnyx 2.0: Enabling deeper insights with intuitive Real-Time Delphi

Unlock deep collective intelligence with 4CF Halnyx 2.0, the modern Real-Time Delphi platform designed from the ground up by delphi veterans. Move beyond basic tools and experience an intuitive, engaging environment architected to facilitate robust dialogue, reveal nuanced insights, and drive meaningful consensus with ease.

Key advantages of the Halnyx 2.0 approach

Halnyx 2.0 isn't just about automating Delphi; it's about enhancing the quality of the dialogue and the depth of the insights generated:

- Fosters true understanding, not just surface agreement: Halnyx 2.0 is built to make exploring diverse reasoning effortless, moving beyond simple convergence metrics to support the development of genuinely informed consensus grounded in shared understanding.
- Enables dynamic real-time collaboration: Participants react, reflect, and revise their views within a fluid, engaging process that respects their time and keeps momentum high.
- Provides clarity through reasoning exploration: The platform features intuitive tools for effortless exploration of qualitative justifications. This allows to easily identify key arguments, understand the basis for disagreements, and track how reasoning evolves.

- Ensures valuable perspectives aren't lost: Intelligent visualizations and features highlight the full spectrum of opinion, including critical outlier
- viewpoints. 4CF Halnyx 2.0 helps pinpoint where opinions diverge and why.
- Offers intelligent guidance for focused deliberation: Built-in indicators can gently guide participants' attention towards areas needing further reflection, such as significant disagreements or impactful new arguments.
- Transforms complex data into actionable insights: Sophisticated yet easy-to-use data visualization and analytics tools help facilitators and stakeholders quickly grasp complex patterns in both quantitative scores and qualitative reasoning.
- Prioritizes an intuitive, friendly user experience: Designed for seamless use by both experts and administrators, 4CF Halnyx 2.0 features a modern, clean interface that minimizes cognitive overload, maximizes engagement and keeps participants focused.

Core features designed for effective Delphi

Halnyx 2.0 incorporates functionalities specifically tailored for highquality Delphi studies:

- Modern Real-Time Delphi engine: Supports dynamic feedback and efficient participation.
- Robust and scalable platform: Handles both small focused groups and large-scale studies reliably.
- Integrated quantitative and qualitative data: Seamlessly links justifications to ratings for easy analysis.
- Advanced comment exploration tools: Powerful filtering, sorting, and visualization for deep dives into reasoning.
- Structured interaction features: Supports features like comment threading or rating to enhance dialogue.
- Flexible questionnaire design: Accommodates various question types while promoting clarity.
- Intelligent indicators and notifications: Guide attention and keep participants informed (e.g., via personalized digests).
- Comprehensive data analytics and reporting: Visual dashboards and structured exports for efficient analysis.
- Streamlined administration: Reduces facilitator burden for setup, monitoring, and data management.
- Expert support: Backed by experienced Delphi specialists to help maximize study success.

Applying 4CF Halnyx 2.0: Facilitating better decisions across sectors

The intuitive power and deep insight capabilities of 4CF Halnyx 2.0 make it an invaluable tool for tackling complex, high-stakes challenges where structured expert dialogue is essential:

- Strategic foresight: Evaluate and investigate trends, potential disruptions, emerging technologies or wild cards, challenge assumptions, verify scenarios and more.
- Policy development and evaluation: Engaging diverse stakeholders, assessing impacts, and building legitimate consensus.
- Medicine and healthcare: Developing clinical guidelines, defining Core Outcome Sets, setting research priorities with input from clinicians, patients, and researchers.

- Academic and scientific research: Facilitating collaboration, synthesizing complex knowledge, and identifying research frontiers.
- Investment and innovation strategy: Making informed decisions on high-stakes projects by evaluating risks and opportunities.
- Risk assessment and management: Identifying emerging threats, understanding complex interdependencies, and shaping proactive responses,

especially in the age of AI.

• Urban and infrastructure planning: Engaging communities and experts for sustainable development outcomes.

Experience the next generation of Delphi

Move beyond the limitations of outdated tools and unlock the true potential of collective intelligence. 4CF Halnyx 2.0 provides the intuitive, powerful, and insight-focused platform needed to conduct effective Real-Time Delphi studies that deliver meaningful results.
